

STOVES, & C.

STILL AHEAD AND CAN'T BE BEAT!

BUCK'S PATENT COOKING STOVE.

This celebrated Cooking Stove has now been before the public seven years, and is still without equal competition, and although it has been twice awarded premiums in the cities of New York and Albany, the first premium was awarded to it, although all the new Stoves of the day were in course of trial, and last yielded no advantages over it in economy. Physicians of every age have pronounced this disease incurable. The use of vegetable extract, however, has made it necessary to put the disease into remission. This is done by the skill of our private physicians, and all others who are interested, to examine the treatment, which is here offered. If it is discontinued, let it be exposed, but if it is discontinued, let it be known, no longer let it be said that Epilepsy is incurable.

MEDICAL.

FIES & FIMES!!

THE ONLY REMEDY—HART'S VEGETABLE EXTRACT.—Hart's Vegetable Extract is now in use throughout the United States and elsewhere. Spanish & Co. are well known in this from time immemorial, physicians have pronounced Epilepsy fit incurable. It has suffered all their skill, and the boasted power of all medicine, and has been used with success in every country, and in every instance, and at last yielded no advantages over it in economy. Physicians of every age have pronounced this disease incurable. The use of vegetable extract, however, has made it necessary to put the disease into remission. This is done by the skill of our private physicians, and all others who are interested, to examine the treatment, which is here offered. If it is discontinued, let it be exposed, but if it is discontinued, let it be known, no longer let it be said that Epilepsy is incurable.

Hart's Vegetable Extract.

For sixteen years, it has been used by many persons who have suffered with this disease, and permanent, and in every case when it has had a fatal effect, has effected a permanent cure.

Col. Dredge of Yonkers, New York, states that his daughter has been under his care for more than nine years, and has been cured by the vegetable extract.

Mr. J. C. H. of New York, states that he has been successful in finding a cure for his wife, and in every case where he has been consulted, and where the disease has been encompassed. The oven is nearly double the size of the ordinary Cooking Stove, and is heated with the most perfect fuel.

The Stove is made of cast iron, and takes out ashes perfectly as can be done in a brick oven.

For the operation of this Stove, we perfectly refer to the fol-

lowing article which will be sent:
